# WELCOME TO THE VERY BEST IN OUTDOOR FURNITURE

Oxley's make luxury, bespoke outdoor furniture in the most sustainable way possible, completely weatherproof no matter where in the world it is to be situated.

In this brochure and accompanying pricelist we seek to illustrate some of the endless combinations of design, metal colour and fabric which allow our customers to create their furniture exactly how they want it.

# OUR COMPANY VALUES

Oxley's furniture is a family business that has been producing fine cast and fabricated aluminium furniture from our Cotswold factory in England since 1991.

Manufacturing the best outdoor furniture in the most sustainable way possible is the essence of what we strive to do as a business. Aluminium is one of the world's most recycled manufacturing materials, from drinks cans to alloy wheels and airplane parts. All the aluminium furniture we have ever made has been from recycled material and is constructed to last generations.

Our components come from foundries where this recycled aluminium is graded, mixed and calibrated into the correct, highest grade, aluminium alloy with which we make our exceptionally strong and durable furniture.

It is the perfect material for all-weather furniture; when properly treated it does not rust, is far lighter than other materials so chairs and tables can be easily moved and, most importantly, it requires no maintenance to keep it looking good. The quality of aluminium furniture you buy depends on the quality and quantity of the metal used in its manufacture and the time and care taken to prepare this for the finishing process.

Oxley's specialises in final construction of the furniture and applying the very best finish technology allows, thereby being able to guarantee our exceptional quality.

Our furniture will last generations.

**You will never regret investing in Oxley's furniture.**

# OUR COLLECTIONS

## ARTEMIS

PAGE 5

The Artemis design takes inspiration from the Curule seat dating back to ancient Rome, named after the Greek Goddess of hunting.

This powerful design was used by the highest government dignitaries and was a symbol of authority. We have adapted the original armchair design for spectacular comfort with or without a cushion.

The intricate swirling lines of the armchair back design are replicated in the Artemis tabletop, with the chair leg arch mirrored in the legs of the table.

## GRANDE

PAGE 13

Our Grande design harks back to the baroque period of 18th century France.

The intricate detailing on both the chair and tabletop can only be achieved through sand casting and creates a throne like effect.

A design like this only has to be seen to know it will still be in use in generations time, an example of our flawless craftsmanship.

## LUXOR

PAGE 21

The Ancient Egyptians used a great deal of animal imagery in their temples and artefacts and this design is named after their ancient capital, Luxor.

The armchair design features a lion's head on each arm of the chair and lion's head motif on the seat back, with a lion's claw detail on each foot.

The table design features lion's claw feet on the legs and a swirling flower pattern on the tabletop. The Luxor design is a true symbol of the power and elegance.

## OCTAVIA

PAGE 35

In collaboration with the National Trust, the Octavia Collection takes its design inspiration from a detail from an 1872 pen and ink drawing of an herbaceous border by the 19th-century garden designer Gertrude Jekyll.

The prominent flower pattern is replicated in the back, arm and seat of the chair as well as the tabletop in beautifully intricate detail. Designed specifically with a typical English garden in mind, furniture like it (originally made in cast iron) would have been found in large gardens for nearly 200 years.

## PETROSPHERE

PAGE 45

Our Petrosphere design is inspired by what we believe to be neolithic art, the carved stone balls left behind by the ancient peoples who lived in the British Isles from about 5,000 years ago.

No one knows what these intricate carvings were for or how, at a time before metal usage, they were carved. Our belief is that they were carved for their tactile feel and we have incorporated this idea into our Petrosphere design.

We have used one of the most intricate designs found as the basis of all our Petrosphere table tops and the tactile element in the armchair.

## SCROLL

PAGE 53

The beautiful interlacing lines of our Scroll collection are inspired by stone carvings left around the British Isles by the ancient Celts.

Although these carvings vary significantly in pattern, at the heart of them all is the Celtic knot. This simple endless weave has no obvious start or finish and is thought to represent eternal life.

Naturally, for furniture like ours - built to last a lifetime and beyond - it is the perfect symbol to cast forever into a design.

## SIENNA

PAGE 63

The Sienna design is one of our most popular as it belongs in both contemporary and classic locations.

The diamond detail of the seat back can be referenced in buildings old and new. Under the cushion the seat has a beautiful basket and weave design.

The deep casting of the tabletop demonstrates the fabulous quality of this collection, durable furniture has never looked so stunning.

## CASA

PAGE 77

Our high backed Casa chair has a latticework back and seat which makes it extremely comfortable for prolonged sitting, with or without a cushion. The lightest of our chairs at 7kg for the diner and 8kg for the armchair it is also partially stackable. Although we only make two round tables in this Casa design the chair does go well with many of the other table designs we make.

# ARTEMIS

Artemis 2850 Table set – Anthracite

## THE ARTEMIS COLLECTION

The Artemis design takes its inspiration from the Curule seat dating back to ancient Rome, named after the Greek Goddess of hunting.

This powerful design was used by the highest government dignitaries and was a symbol of authority. We have adapted the original armchair design for spectacular comfort with or without a cushion.

The intricate swirling lines of the armchair back design are replicated in the Artemis tabletop, with the chair leg arch mirrored in the legs of the table.

The collection features both round and rectangular dining tables to accommodate from 4 to 12 companions along with a double bench, lounge, and coffee table.

# CHOICE OF FURNITURE COLOURS

All our furniture colours are illustrated on our website, and we can always send metal swatches to our customers for final colour confirmation. We offer many colour finishes as standard in our range, which normally provides sufficient colour choice. However, if a different and particular colour is required, we can finish the furniture in any RAL colour specified.

We also offer Oxley's Classic Finishes. In 1991, the company was the first to make outdoor furniture in weathered colours. As many metals age they take on a different patina which is more interesting and gives it greater depth of colour. Oxley's became expert in copying these effects of years, to create what we called Classic finishes. This time-consuming process can only be done by hand and requires a great deal of experience. For this reason, these classic finishes, Antique Gold, Titanium and Tuscan White incur an additional charge.

# FURNITURE FABRICS

Over the years we have made cushions in a vast variety of fabrics and been privileged to work with all the world's best fabric houses to create the exact look our customers want. Outdoor fabrics are essentially all made of the same materials, specifically solution dyed acrylics. They have more or less the same durability in the outdoor environment against moisture, ultraviolet light, chlorine and mould. They do though vary greatly in depth of colour, texture and weave patterns hence our pricing structure, Timeless, Enhanced, Statement and Customers' Own Fabric.

**Our Timeless range** are those in the Sunbrella® Timeless range, an extensive pallet of colours.

**Enhanced Fabrics** are those with a wide variety of patterns and designs from well-known fabric houses.

**Statement Fabrics** are sumptuous fabrics that have complex patterns, textures and weaves.

**Customers' Own Material (COM)** Customers often want to source and supply their own choice of fabric from different collections available around the world. In this instance we provide the exact quantities of fabric required for each item we are making and once the fabric has been supplied to us, we will use it to make up the cushions for the order

## Furniture, Tabletop Covers and Waterproof Cushion storage Bags

Oxley's Furniture is completely weatherproof wherever in the World that it lives. However, to keep the furniture clean and the cushions dry we offer our customers various solutions.

### **Furniture Covers**

These are a quick and easy solution to the outdoor season cushion storage. We make them for furniture featuring our sumptuously big cushions. Our protective furniture covers are designed to withstand rain and keep cushions clean. They are not totally waterproof in extreme weather.

### **Tabletop Covers**

These easily slip onto tabletops and offer winter protection from birds flying overhead and lichen growth.

### **Waterproof Cushion Storage Bags.**

These are available in all cushion and combination of cushion sizes. They ensure cushions are always dry for immediate use in the outdoor furniture season and an excellent method of winter storage.

# PRODUCTION

Our furniture is made in a combination of castings and profiles. For the castings the molten recycled aluminium is poured into sand moulds which have been shaped to the form of the original hand carved design. The metal cools in its own time and the sand mould is then broken (each mould can only be used once) to extract the new casting.

Each casting is then worked by hand until it is ready to be welded to another casting or profile. The profiles can be formed to create different frame shapes. Each item of furniture is thus built up slowly using many individual pieces until finally it is complete.

It then goes through the blast process where it is pelted at enormous velocity with manganese shot to remove any rough edges and create a physical key for the paint process. We apply a primer and then the chosen final colour. These last two stages are done in our high temperature oven.

Aluminium is the perfect material for all-weather furniture. When properly treated it does not rust, it is far lighter than iron so chairs and tables can be easily moved but most importantly it requires no maintenance to keep it looking good.

The quality of aluminium furniture you buy depends entirely on the amount of material that is used in manufacture and the time and care taken to prepare it before painting.

Done the Oxley's way, it will last generations.

## HERITAGE

Metal garden furniture has been used in the English garden since the industrial revolution in the 18th century. Outdoor furniture was initially made in wrought iron but as sand casting became more widespread and expert, cast iron took over. By using this method outdoor furniture became opulent in the 19th century. The Victorians loved their gardens, and they adorned these spaces with urns, statues, gazebos – and, of course, chairs, benches, settees and tables.

Traditional designs including Gothic Revival, Renaissance Revival, and Rococo styles were often ornate and lavishly detailed with fruit and floral motifs.

Oxley's draws designs inspiration from these traditional styles rather than the recent trend for minimalist outdoor furniture, whilst replacing cast iron with cast aluminium.

# CARE AND MAINTENANCE

## The Furniture Frame

Wash the furniture frame with a soft rag and very occasionally car soap. Unlike dishwashing detergents and other household cleaners which are best avoided, a fine car soap will not affect the finish on the furniture. A very occasional waxing with car wax will help maintain the finish.

## Cushions

Fabrics should be cleaned of crumbs and other bits of food before they become embedded. This is best done by brushing and then cleaning the cover (without removing the inner) with soap and water. Sponge directly onto the stain. Allow the cushion to air dry. Always make sure that cushions are completely dry before storing for the winter.

# WARRANTY

All Oxley's furniture comes with a comprehensive product warranty – a testament to years of manufacturing experience and the use of the best materials and techniques.

## Structure

Oxley's extends a lifelong conditional warranty on the structural integrity of our customers' furniture. In the unlikely event that your Oxley's furniture fails structurally during normal domestic usage we will repair, refinish or replace the aluminium frame without charge. For commercial environments this warranty is 3 years.

## Paint Finish

Oxley's provides a 3 year warranty on our paint finish. Should our finish peel, blister or discolour under normal wear and tear then we will repair, refinish or replace the item without charge.

Powder Finishes evolve over time as they are batch produced and may be subject to minor colour variations and whilst we therefore guarantee to produce goods matching any item we cannot guarantee an exact match between pieces on different orders.

## Cushions

Standard cushion fillings and covers are guaranteed for 3 years against any manufacturing defect. The covers are made from 100% solution dyed Acrylic. The foam inners meet the requirements of Schedule 1 Part 1 of the UK Furniture and Furnishings (Fire) (Safety) Regulations 1988. Should FR treatment or back coating be required, this does not come as standard and has to be requested at the time the order is placed.

## Buy Back Guarantee

Oxley's offers our private customers a simple, powerful guarantee; we will buy back any piece of furniture you've bought from us within 10 years of you buying it, for half its original price\*.

We will then reprocess and recycle your furniture, making it new again so it can enjoy a second life in another home

**Please see our price list for terms and conditions and our website for full warranty and privacy policy.**

\* This guarantee applies to: original Oxley's customers who have owned their Oxley's furniture for 12 months or more (the original purchaser must be registered as an Oxley's customer). Only furniture, not cushions, and not sales items. The net price of purchase and not any purchase tax (VAT). If you'd like us to collect your furniture, we will at an agreeable rate.
